Dear National Security Forum of Nevada Members,

It is with tremendous gratitude that I extend sincere thanks for the incredible program your organization developed for our 12th grade students this year. On May 25 – 27th your organization developed and facilitated the 2021 National Security of Nevada Virtual Youth Security Forum. The robust slate of speakers provided valuable opportunities for our students to engage in relevant discussions about topics that are critical to national security. It was particularly beneficial for our 12th grade students to be able to explore the topics and learn about potential career paths in national security as well.

Students have expressed their thanks for providing this opportunity. Many have indicated that this opportunity broadened their perspectives and opened windows to the possibility of exploring these topics more deeply in the future. Richard Clark's We the People students from Reno High School anchored their final research projects around the topics of the virtual forum. Note the attached pictures that capture some examples of those projects.

Social studies teachers in WCSD are excited to continue this collaboration and investigate unique ways that they can incorporate the video recordings into their lesson plans and classroom instruction. Again, thank you so very much for your continued support of students in WCSD.

Sincerely,

Sarah Brown
