

# 2023 Youth Security Forum

The 2023 Youth Security Forum (YSF) brings students together from four Washoe County School District (WCSD) high schools to engage in spirited and civil discussions about timely and challenging national security issues. The National Security Forum of Nevada and WCSD, in partnership with Braver Angels of Nevada, is hosting the 2023 YSF to equip the next generation of national security leaders and informed citizens with the tools, outlook, and motivation to discuss timely and important topics with their peers, families, and communities. Civil discourse is a pillar of our national security. Bridging divisions at home strengthens our standing abroad. Armed with Braver Angels resources, Depolarizing Within and Skills for Bridging the Divide, YSF students will practice initiating conversations, listening to others, and sharing their perspectives on timely issues pertaining to the US military, technology, climate change, and diplomacy.
